

GARAGE DOORS

WIŚNIEWSKI

GATES | WINDOWS | DOORS | FENCES

SECTIONAL DOORS **UniPro SNP**

Intended use: The sectional garage doors are dedicated primarily for buildings with a low lintel, with little space for torsion springs and narrow side clearance, making it impossible to use traditional solutions. The weight of the door is balanced by a properly selected pull spring system installed along the vertical tracks.

THERMAL INSULATION

Steel panels are made of galvanized sheet, filled with freon-free, hardened polyurethane foam and coated with polyester paint on both sides. This ensures very good thermal insulation and acoustic properties. Each door features a system of flexible and robust gaskets both along the entire circumference and between the panels, which considerably contributes to the insulating qualities of the door.

SAFETY

Safety systems focus on minimizing all traces of risk. Regardless of the method of operation, WIŚNIEWSKI doors ensure comfort, safety, and security. Our products are fully compliant with the PN-EN 13241 standard.

FUNCTIONALITY

With a pull spring system installed along vertical tracks, the doors can be installed in buildings with low lintels. The SNP door design enables easy and quick operation.

UNIPRO SNP DOOR DESIGN

The sectional door is installed behind the opening, it opens vertically upwards, and does not take up any space in the driveway. The space in front of the door, as well as inside the building, is used to its full potential, and the door tracks allow the door to operate without colliding with anything inside the garage. Numerous protective devices ensure safe opening and closing, regardless of the method of operation: manual or automatic.

Thanks to the pull spring system installed along the vertical tracks, the door can be fitted in buildings with low lintels. The number of springs is adapted to the door size, which provides maximum comfort and safety of use. The shape of the panels is designed to prevent fingers from being crushed. All the steel elements are galvanized (tracks, frames, fastening elements). The door is fitted with rollers with bearings which ensure proper guiding of the door leaf, while a dedicated profile of the tracks prevents derailing.

Large dimension gates are additionally reinforced with special elements that increase the rigidity of the entire structure, such as an additional hinge fitted in the middle of the door or a door leaf reinforcing profile. Door panels are coated with high quality polyester paints or film-coated. This provides optimum protection against the weather conditions and ensures many years of operation. Thanks to the vast range of colours, WIŚNIEWSKI garage doors can be easily matched to the building's façade. WIŚNIEWSKI doors are an investment that stands the test of time.

**1 Automatic operating units**

Proven and reliable automatic operating units: METRO Smart io, MOTO io or SPARK.

2 Tracks and opening frames

Made of galvanized sheet, they provide a stable and durable structure.

3 Panel hardware in the RAL 9002 colour

The colour matches the panel colour on the inside.

4 Bottom gasket

High quality gaskets perfectly adapt to the shape of the floor and prevent water and dirt from penetrating under the door to the inside of the garage.

**Pull springs**

A pull spring system mounted along the vertical tracks. Guaranteed minimum number of cycles – 20,000.

**Overload safety device**

In automatic doors, the door leaf stops and reverses when the bottom edge contacts an obstacle.

**Double-lip circumferential seal**

Used as standard, they ensure improved sealing of the door.

**Special panel shape**

They prevent fingers from being crushed.

**Guiding rollers with bearings**

They ensure proper running of the door leaf.

**Photocells**

They prevent uncontrolled door leaf operation when an obstacle is present within the clear passage – optional accessory.

The factors are provided for doors SNP without glazing, ventilation grilles, aluminium panels or additional thermal gaskets.

INSTALLATION DIMENSIONS

S_o - opening width, ordering dimension

H_o - opening height, ordering dimension

N - minimum required lintel height

W₁ - minimum required side clearance

W₂ - minimum required side clearance

E - minimum garage depth with clearance under the ceiling

PANEL STRUCTURE

Robust and reliable design

We consistently follow the same design principles for our whole range of sectional garage doors. Thanks to our robust and reliable design, you can rest assured that the door will meet even the most extreme requirements and withstand the most demanding operating conditions. Special solutions, such as our proprietary panel built using the **5-ply** sheet bending system, ensure stable fixation of elements, which further contributes to the strength of the structure. The top section is fitted with a lip gasket. The internal side of the panel in the RAL 9002 colour. The panel is infilled with polyurethane foam whose composition is precisely determined by our specialists.

Film coatings available with garage doors with the panel:
G - without ribs or W - with high ribs

HOME INCLUSIVE 2.0 colours

The Home Inclusive 2.0 colour collection combines four product groups: Gates | Windows | Doors | Fences, which provide a consistent design of all the products.

HI EARTH

HI STONE

HI STEEL

HI RUBY

Special colours from the HI palette:

Doors in light colours should be fitted on the side exposed to sunlight. It is not recommended to fit dark colour doors in such conditions, in particular RAL: 3007, 4006, 4007, 5004, 5008, 5010, 5011, 5020, 5022, 6008, 6009, 6015, 6022, 7015, 7016, 7021, 7024, 7026, 7043, 8014, 8019, 8022, 9004, 9005, 9011, 9017, 9021, Anthracite, Walnut, Macore, Dark Oak, Swamp Oak, Siena Noce, Siena Rosso, Quartz Anthracite, Summer Cherry, Sapeli, Dark Green, Sheffield Oak Brown, Rustic Oak, Chocolate Brown, Black Ulti-Mat, Brush Schwarzbrown, Umbragrau, Anthrazitgrau.

When a dark colour is chosen for doors installed on the side exposed to sunlight, the panels can heat up excessively, which may result in deformation. The door leaf cannot be painted from the inside. When ordering doors in matching colours in different orders (delivery batches), the colour hues can differ due to technological reasons.

OPTIONAL ACCESSORIES

PORTHOLES

Type O-1A

Type O-2A

Type R-1A

Type R-2A

Type A-1 – made of double, clear acrylic glass, with a rough frame surface. The external frame is available in RAL 7016, RAL 8003, RAL 8011, RAL 8014, RAL 8017, RAL 9005, RAL 9016. The internal frame is always white. Internal/external frame made of PVC. External dimensions of the frame: 600 x 270 [mm]. Light transmission 86%.

Type O-1A, O-2A – infill: triple, clear, acrylic glazing unit; frame (ext./int.): stainless steel, satin. Not available with doors with caisson ribs. Available with doors up to So=3,750 mm.

Type R-1A, R-2A – infill: triple, clear, acrylic glazing unit; frame: stainless steel, satin. Not available with doors with caisson ribs. Available with doors up to So=3,750 mm.

GLASS

Intended use: for double glazing of glazed aluminium panels and VISUAL glazing.

No-Scratch

Glass pane with a special coating improving its strength, very good resistance to scratching and sunlight compared to standard glass.

Satin

Opaque glass pane. Double glazed pane opaque from the outside and clear from the inside. Light transmission 78%.

Glass pane SAN R

Opaque (so-called frosted) double glazed pane clear from the inside. Light transmission (77-79%).

Grey

Clear glass with a slight brown hue. Double glazed pane, clear from the inside, non-coloured from the inside. Light transmission (51%).

VENTILATED PANEL

Aluminium panel without a thermal break or with a thermal break, infilled with expanded mesh. The door can be fitted with only one ventilated panel.

RC2 ANTI-BURGLARY KIT

The garage door fitted with the RC2 kit has a certificate issued by the IFT Rosenheim (Germany) notified body. The kit includes: automatic locking mechanism, reinforced deadbolt system, deadbolt plates, safeguard preventing the carriage from being unlocked, and a track bumper.

The RC2 kit is only available for doors with the MOTO and METRO drive units.

LOCK/HANDLE

The lock is fitted with a single-side lock cylinder, the lock cylinder is accessible from the outside (three keys), from the inside the lock is operated with a latch. In the manually operated SNP door with $S_o \geq 4,000$ [mm], the lock engages the deadbolt on both sides (single-side locking is available as an optional accessory). On the outside of the door leaf, a plastic handle with a cover plate type PVC-1 or KL-2 is fitted. A black plastic handle is installed on the inside. The UniPro SNP and SNP 2.0 doors are not available with a handle fitted in the middle of the door. The PVC-1 handle is available in black. The KL-2 handle is available in the following colours:

- **MAT** – RAL 9005, RAL 9016, RAL 8014.
- **GLOSS** – RAL 9006, RAL 1036, RAL 1035, RAL 7048.

KL-2 handle, colour: RAL 9006

KL-2 handle, colour: RAL 1036

KL-2 handle, colour: RAL 1035

KL-2 handle, colour: RAL 7048

KL-2 handle, colour: RAL 9016

KL-2 handle, colour: RAL 9005

KL-2 handle, colour: RAL 8014

Standard handle

ADDITIONAL SEALS

The UniPro SNP doors are fitted with circumferential double-lip seals as standard. The UniPro SNP door can be fitted with additional **thermal seals**, which enable the structural steel elements to be isolated from the wall surface, or **finishing thermal seals**, which make it possible to provide an aesthetic finish of the garage door opening by eliminating the gap between the thermal insulation and the door leaf surface, which further improves door insulation.

Thermal seal

Finishing thermal seal

PRE-ASSEMBLY OF EXTENSION SPRINGS

It is possible to order pre-assembled extension springs. The option enables quicker and easier door installation. Not available for the UniPro SNP garage doors ordered with the RC2 anti-burglary kit.

OTHER MANUFACTURING OPTIONS

Garage door with an aluminium panel glazing

Garage door with the VISUAL glazing – available for garage door widths up to $S_o=3,000$ [mm]

Garage door with a ventilated panel – expanded mesh

AUTOMATIC OPERATING UNIT KITS

The METRO Smart io, MOTO io, and SPARK series drive units are dedicated for garage doors and ensure full functionality and overload protection as standard.

The EXTENDED CARE warranty allows you to extend the standard warranty for a complete product – an automatic sectional door – up to 5 years, provided it is factory-configured with the METRO Smart io, MOTO io, or SPARK drive unit.

io-homecontrol is a modern, safe, and reliable radio technology by Somfy, which lets you control your devices compatible with the smart home concept. Thanks to this technology, the drive unit not only receives commands from the controllers, but it can also send feedback. The io-homecontrol technology makes it possible to connect the METRO Smart io and MOTO io drive units to the TaHoma system to provide additional functions, connecting the garage door with smart devices available at home.

WIŚNIEWSKI 868 MHz is a modern SOMIoq2 two-way radio system for controlling garage doors and entrance gates. Thanks to this technology, the drive unit not only receives commands from the transmitters, but it can also send feedback. The SPARK automatic operating units were also equipped with a wi-fi module, which makes it possible to control the gate from an application installed on a mobile device, giving the drive unit additional functionality.

OPTIONAL ACCESSORIES FOR THE METRO AND MOTO AUTOMATIC OPERATING UNITS

WALL-MOUNTED TRANSMITTER

The 3-channel transmitter makes it possible to control drive units and wireless receivers. Examples of use:

- - full opening/closing the door,
- - LED lighting under the tracks, and/or under the track fastener,
- - top panel tilt.

Wireless communication makes it possible to install it in any place and doesn't require any cables.

KEYPAD 2 CODE KEYPAD

The 2-channel code keypad makes it possible to control drive units and wireless receivers.

EXTERNAL RADIO RECEIVER io

Makes it possible to control the drive units of other manufacturers using the Pulsar transmitter. It is a two-channel device which makes it possible to program as many as 32 transmitters.

BACKUP POWER SUPPLY BATTERY

When connected to the METRO Smart io and MOTO io drive, it provides power for several cycles of emergency operation.

MECHANICAL CARRIAGE LOCK

It is an additional safeguard which increases garage door safety when mounted to the carriage.

SIGNAL LIGHT

Supports the METRO Smart io and MOTO io drive units. Warning function. Orange blinking light indicates that the door is operating.

EXTERNAL CODE KEYPAD

The single-channel device can be used to control the garage door with a code. For outdoor installation, requires cabling.

PHOTOCELLS

They prevent uncontrolled door leaf movement when an obstacle is present within the clear passage.

OPTIONAL ACCESSORIES FOR THE SPARK AUTOMATIC OPERATING UNITS

2CH WALL-MOUNTED TRANSMITTER

2-channel device which lets you control both your drive units and radio receivers. Communication between the transmitter and the receiver occurs wirelessly, so the device can be mounted in any place. The wall-mounted transmitter has a feedback function that informs the user about the position of the door using a LED.

WIŚNIOWSKI 868 RADIO RECEIVER

It makes it possible to control other drive units with the DART and DART Vibe transmitters, and the wall-mounted transmitter. The radio receiver is a two-channel device operating at the frequency of 868 MHz, making it possible to program up to 40 transmitters.

DART/ DART VIBE REMOTE CONTROL TRANSMITTER

The transmitter makes it possible to control the operation of several drive units. The DART Vibe transmitter has a feedback function in the form of vibration, which is a confirmation that the signal from the transmitter was received.

ENTRAcode+ CODE KEYPAD

Compatible with the WIŚNIOWSKI 868 MHz radio receiver. Control of up to five devices. Power supply: 4 X AA 1.5[V] batteries. IP 54 protection rating. Up to 30 m range. ENTRAcod+ is a wireless device that does not require any wiring and is designed for surface mounting.

PHOTOCELLS 180

Prevent uncontrolled door leaf movement when an obstacle is present within the clear passage.

SIGNAL LIGHT

Connected to the SPARK drive unit, it has a warning function. Orange blinking light indicates that the door is operating.

CONEX – INPUT BOARD

Additional board with signal, impulse inputs, whose inputs were defined for opening and closing. Compatible with wired Smart Home systems.

OUTPUT – SIGNAL BOARD

Additional board with a signal input. Information about the position of the door: door not open (NO)/door not closed (NC). Compatible with wired Smart Home systems.

LOCK – MOTOR LOCK

A magnetic lock which blocks the drive unit in any position of the door. An additional element able to withstand loads up to 300 kg, increasing door safety.

ACCU – EMERGENCY POWER SUPPLY BATTERY

Connected to the SPARK drive unit, it provides power for several cycles of emergency operation in case of the main power supply outage.

RELAY – ADDITIONAL TRANSMITTER

An additional transmitter with the NO/NC output enabling e.g. switching on lights in the garage and external lights or other electrical devices.

SECTIONAL DOOR

UniPro SNP | RAL 9005 | silkline

UniPro SNP | winchester 49240 XA | smoothgrain

TECHNICAL DATA

	UniPro SNP
Leaf	A panel made of galvanized steel sheet with two-side polyester coating, galvanized and painted on both sides, infilled with high density PU foam $g=42 \text{ kg/m}^3$ without HCFC
Spring type	Pull springs, mounted along the vertical tracks
Minimum number of cycles	20,000
Thermal transmittance factor U of the panel [W/m ² ·K]	0.48
Watertightness class	2 in accordance with PN-EN 13241 section 4.4.2
Wind load resistance class	3 in accordance with PN-EN 13241 section 4.4.3
Air permeability class	4 in accordance with PN-EN 13241 section 4.4.6
Sound reduction index Rw [dB] without a wicket door / with a wicket door	23 in accordance with PN-EN ISO 717-1: 2020

CONTROL THE GARAGE DOOR WITH YOUR SMARTPHONE!

TaHoma – Your smart home

The io-homecontrol® system with radio transmission makes it possible to wirelessly connect the METRO smart io and MOTO io drive units to the smart home controlled by Somfy's TaHoma Switch central control unit. Building a comprehensive smart home provides a number of benefits and additional features that enhance your comfort every single day. The app gives you constant access to the most important functions of the elements of your home.

The WIŚNIEWSKI Connected app – new quality as standard

When you choose WIŚNIEWSKI Connected, you don't need a smart home central control unit. WIŚNIEWSKI garage doors with the SPARK drive unit are ready to connect as standard – you can connect them to the smart home without any additional devices or extra charges. WIŚNIEWSKI Connected uses Wi-Fi instead of radio transmission and the app allows you to control the garage door from almost any place in the world.
