

A modern, two-story house with a dark, gabled roof and large glass windows is illuminated at night. The house features a combination of dark and light-colored siding. The background is a dark blue sky with a network of glowing blue lines and dots, suggesting a smart home or IoT theme. The foreground is a dark, reflective surface.

GATES | WINDOWS | DOORS | FENCES

SMART garage doors, windows, roller shutters, doors, gates, and fences from WIŚNIEWSKI

Are you sure you know what it means? Once you have purchased your garage door, windows, roller shutters, doors, gate or fence, you get the opportunity to create your own smart home.

Everything is overseen by WIŚNIEWSKI smartCONNECTED – our idea and approach to smart home solutions. Within it, you will find two paths leading to the world of smart technologies. They are two different paths, but they share one goal – to make your home, its elements, and fittings support you in your daily life.

The first of these paths is WIŚNIEWSKI Connected – smart functionality as standard in selected products. It does not require a central control unit, and to operate it, you only need a free smartphone app.

The second option is the world of TaHoma® switch, which integrates not only selected WIŚNIEWSKI products, but also lighting, monitoring, and ventilation systems, among others. At the heart of the system is a central control unit that manages all the elements. You control it via the app.

In this brochure, you will find all the key information about both paths – to help you choose the one that best meets the challenges of your everyday life. Welcome to the world of WIŚNIEWSKI smartCONNECTED. A world where you will rediscover your home.

Integration and customization.
Creating smart rules and scenarios that make everyday life easier.

Remote control and access.
Manage property access from anywhere via a smartphone.

Safety and monitoring.
One of the most important features of smart solutions in the context of property access.

Closeness and comprehensiveness.
One app is all you need to control selected elements of your home.

Smart home

Mobile app

Safety and privacy

Comfort of use
